THREE-STAGE REVOLUTIONARY SNOW THROWERS

WINTER

PRODUCT PROGRAM 2013/14

Cub Cadet

X SERIES

SNOW THROWERS

Cub Cadet 2X TWO-STAGE

Cub Cadet 3X THREE-STAGE

Cub Cadet 1X SINGLE-STAGE

THE RIGHT SOLUTION FOR ANY DEMAND!

The new Cub Cadet Snowthrower Generation. The best size and technique for all snow conditions. A single-stage model for regions with little snow fall and small areas, the 2-stage models for medium to heavy snow and the all new revolutionary 3-stage models which even pull through packed and wet snow with ease.

INNOVATIVE FEATURES FOR AN INCREDIBLE EXPERIENCE

CUB CADET

Cub Cadet 1X SINGLE-STAGE

The core of the 1X Series exists of a rugged and cord reinforced rubber auger. Once in action, this rubber auger clears the path down to ground. Thanks to its Ergo-handle with remote control for the chute channel, a working light and even an Electric Start, this small power pack delivers highest comfort in a compact design.

• LIGHT SNOW FALL
• GENTLE TO THE PAVEMENT
• IDEAL FOR WALKWAYS AND DOORWAYS

Cub Cadet 2X TWO-STAGE

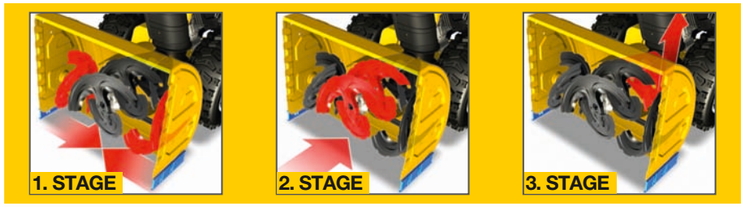
The 2X Series removes snow with a 2-stage system. At first stage, several "X-treme" segments, at right angle to the drive direction bite their way even through harsh and packed snow and pull it into the auger housing. The second stage is a fast rotating impeller which powerfully throws the snow far away through the chute channel.

• MEDIUM TO HEAVY SNOW FALL
• FAST AND EFFICIENT SNOW CLEARING
• IDEAL FOR WIDE WALKWAYS, PARKINGS, ETC.

Cub Cadet 3X THREE-STAGE

The new revolutionary 3X-Series with 3-stage technology. At first stage two X-treme segments in the outer part of the auger housing are pushing the snow to the center, where at second stage a central X-treme Segment drills through the snow and pushes it to the third stage, the impeller, which powerfully throws the snow through the chute channel far away into the choosen direction.

THE NEW REVOLUTIONARY 3X SERIES WITH 3-STAGE TECHNOLOGY



25% MORE SNOW THROUGHPUT **30%** TIME SAVING MUCH EASIER AND EFFORTLESS CONTROL

•FOR HEAVY AND WET SNOW CONDITIONS
• POWERFUL AND TIME-SAVING SNOW CLEARING
• IDEAL FOR FAST SNOW CLEARING OF LARGER AREAS

KEEP THE PATH
TO YOUR HOME CLEAN AND CLEAR.

All Cub Cadet Snowthrowers are made of solid steel and other high quality components. All technical features and advantages are premium level and designed for many years of hard work.

The following technical details are just some of many advantages which make it so easy and comfortable to clear the path through the snow with Cub Cadet.

INNOVATIVE FEATURES FOR AN INCREDIBLE EXPERIENCE | **CUB CADET**

OHV WINTER ENGINES WITH LARGE FUEL TANKS
The Cub Cadet 4-cycle OHV winter engines offer improved starting and a low emission and are especially developed for low temperatures. The large fuel tank allows for a long working without refueling. Thanks to their large displacement they offer enough power even in toughest conditions.

ELECTRIC START
Thanks to the 230 Volt electric start, you can conveniently start your snow thrower by just connecting it with a socket-outlet and pressing the starter button.
One push and you are ready to go.

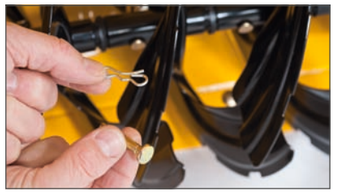
CLUTCH LOCK
The Clutch Lock System keeps both the drive clutch and auger clutch engaged with just one hand. This gives the possibility to change the chute direction or ground speed during operation. A big time saving element and more convenience while out in the snow.

FINGERTIP TRIGGER CONTROLS
Zero-turn power steering is at the tip of your fingers to help you get the job done faster with effortless, single-hand turning. Easily maneuvers driveways of all shapes and sizes, so you can get the job done in less time and with less effort.

POWER STEERING

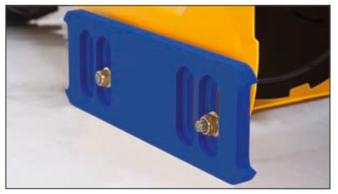
2X TWO-STAGE | 3X THREE-STAGE | Cub Cadet

HEATED HAND GRIPS
Keep your hands warm to finish the job in comfort! To activate the heated grips, just move the switch found on the rear of the dash panel into the ON position. The handles stay warm and you can keep working through the coldest weather.



SHEAR BOLTS
The shear bolts connect the “Xtreme-Auger” with the drive shaft. If the “Xtreme-Auger” blocks, the shear bolts act as rated break points. If one bolt breaks, the „Xtreme Auger“ automatically stops, which prevents other turning parts from breaking. After replacing the pin, the snow thrower is ready for use again. This extends the life-cycle of the machine and reduces maintenance and repair costs to a minimum.

HIGH DISCHARGE CHUTE
The discharge chute is exceedingly high and consists of plastics on the 2X Series and rugged steel on the 3X Series. It is clog-resistant and assures an optimal discharge of the snow. Snow throwing direction and width can be adjusted conveniently from the dashboard.



COOL BLUE SKID SHOES
The revolutionary COOL BLUE skid shoes glide along surfaces for better maneuverability. The advanced long-lasting material won’t rust or mar your drive way. The space between the shave plate and the ground can be adjusted by raising or lowering the skid shoes. For close snow removal, e.g. on a smooth concrete or asphalt driveway, place them in the low position. Use the middle or high position when the area to be cleared is uneven. When operating on gravel, choose the high position.

WORKING LIGHTS
The bright in-dash headlights allow a safe handling even in the darkness.

DRIFT CUTTERS
The drift cutters which are mounted on both sides of the auger housing, break deep snow banks away and thus allow the snow thrower to power through even the heaviest drifts. Better performance and easier working in extremely deep snow.

SHOVEL
Conveniently fastened to the rear of the auger housing, the shovel is designed to clear the discharge chute when it is clogged. Quick and easy access.

THREE-STAGE SNOW THROWERS

SERIE 500 & 700

526 HD SWE
528 HD SWE
530 HD SWE
730 HD TDE

FEATURES

- REVOLUTIONARY NEW 3-STAGE AUGER SYSTEM
- UP TO 76 CM CLEARING WIDTH
- 58 CM INTAKE HEIGHT
- FULL METAL DISCHARGE CHUTE
- SNOW THROWING DIRECTION + WIDTH FROM BEHIND THE DASHBOARD
- CONVENIENT 230V ELECTRIC START
- CUB CADET 4-CYCLE OHV WINTER ENGINE
- HEATED HAND GRIPS
- CLUTCH LOCK SYSTEM
- WORKING LIGHT
- COOL BLUE POLYMER SKID SHOES
- DRIFT CUTTERS

PRODUCT SHOW

ONE STEP AHEAD

The revolutionary new 3X Series from Cub Cadet pulls through harsh and wet packed snow like a tunnel drilling machine through a mountain. That's basically what our new auger system does. It no longer scratches and breaks up the snow, it rather drills into it and presses it to the next stage, a vertical impeller which throws out the snow far up and away from the path. Another innovative technique made by Cub Cadet.

INNOVATIVE FEATURES FOR AN INCREDIBLE EXPERIENCE **CUB CADET**

3X STEEL ACCELERATOR AUGER SYSTEM

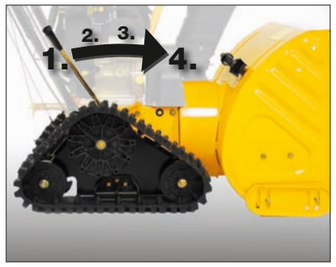
The new innovative design of our auger system is now drilling into the snow with a central auger build in drive direction. It is supported by each an auger element on the L.H. and R.H. side to move the snow to the center accelerator which pushes it to the vertical impeller, that throws the snow far out.

STEEL CHUTE CHANNEL & CHUTE FLAP

The chute channnel on all our 3X Series Snowthrowers is made of thick solid steel to do the job reliably for many years. With the remote chute flap you can adjust the throwing distance and height from throwing right next beside the machine up to as far as 18 metres away.

REMOTE CHUTE CONTROL

Turn the chute channel conveniently 200° from left to right from behind the dashboard in no time. The throwing distance can easily be adjusted with the on dash lever.



BALANCE SYSTEM (730 HD TDE)

1. Packed Snow: Bringing the lever in the “packed snow” position, the weight is shifted to the front end of the snow thrower and presses this onto the ground.

2. Normal Snow: This position allows the user to easily maneuver the unit in normal snow conditions.

3. Gravel Position: Use this position when clearing gravel or split walkways from snow to prevent gravel to be picked up.

4. Transport Position: In this position the auger housing is lifted off the ground for easy moving without leaving scratches on the pavement.

Cub Cadet 2X TWO-STAGE

MADE BY THE BEST TO HANDLE THE WORST.

The Cub Cadet 2X Series 2-stage Snowthrowers can tackle winter's biggest storms. Electric start Cub Cadet OHV 4-cycle engines, power steering and heavy-duty steel augers mean these snow throwers start quickly and move effortlessly through the harshest conditions. The high-impact polymer chute and steel shave plate make it amazingly easy to operate through heavy snow and ice, so you're out of the cold faster.

INNOVATIVE FEATURES FOR AN INCREDIBLE EXPERIENCE — CUB CADET

FINGERTIP TRIGGER CONTROLS

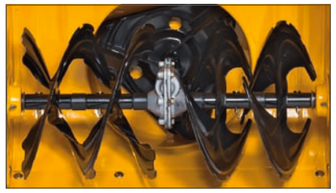
Zero-turn power steering is at the tip of your fingers to help you get the job done faster with effortless, single-hand turning. Easily maneuvers driveways of all shapes and sizes, so you can get the job done in less time and with less effort.

CHUTE CONTROL (524 SWE)

4-way chute control allows you to quickly and effortlessly change the direction and pitch of the snow you throw with one hand, so you don't waste time. You will spend less time in the cold as you control where you want the snow to be thrown.

X-TRAC TIRES

The tires have a special X-Trac profile.
This allows for a perfect grip in the snow.



2X XTREME-AUGER

Instead of one shear pin per auger half, the „Xtreme Auger" has one shear pin in each individual Xtreme Auger assembly. This reduces maintenance costs. Snow and ice are „chopped" up by the auger blades before being fed into the impeller, which transfers the snow through the chute. Advanced technology for better performance.

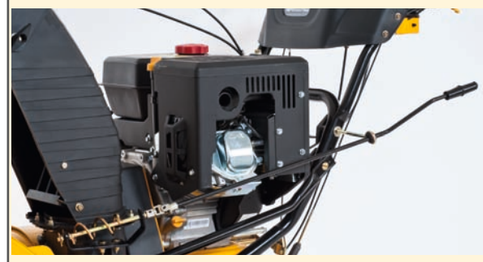
CHUTE CONTROL

(MODELL 933 SWE)

REMOTE CHUTE FLAP CONTROL

Adjust the throwing distance conveniently from the dashboard during operation. Thanks to the clutch-lock system.



CHUTE CRANK SYSTEM

Turn the chute from side to side simply by using the crank. Due to the Clutch Lock system this can be done during operation.

200 SERIES
SINGLE-STAGE
SNOW THROWER

221 LHP

FEATURES

- 53 CM CLEARING WIDTH
- 33 CM INTAKE HEIGHT
- CHUTE ROTATION 190 DEGREES
- CUB CADET OHV 4-CYCLE WINTER ENGINE
- ELECTRIC START AND RECOIL START, EASY STARTING EVEN WITH MITTENS
- REVERSIBLE, POLYMER SCRAPER
- HEADLIGHT
- FUEL LEVEL INDICATOR
- FOLDABLE, ERGONOMIC HANDLE

SMALL JOBS
JUST GOT SMALLER.

The 1X Series has the superior quality and performance you expect in a compact, easy-to-use machine. The adjustable ergonomic handle and high-impact, clog-resistant polymer chute make it easier for you to clear light to moderate snow with speed and comfort. And with an in-dash headlight, enhanced innovation allows for a nice, clean driveway. At any time of day.

INNOVATIVE FEATURES FOR AN INCREDIBLE EXPERIENCE **CUB CADET**

REMOTE CHUTE CONTROL

Throw snow in the direction you want every time with chute control from the operator's station. You will spend less time in the cold as you control where you want the snow to be thrown.

ELECTRIC START & LARGE CONTROL BUTTONS

Large and easy to access control elements make it simple to control the power even with winter gloves. It's incredibly easy to start in tough winter conditions thanks to the 230 Volt electric starter.

HIGH-PERFORMANCE AUGER SYSTEM

This specially designed auger system works like a paddle and shovels the snow into the auger housing and then throws it out over the discharge chute. The auger is made of reinforced heavy duty rubber to avoid damaging the pavement. You will clear your driveway and sidewalk with less effort.

WINTER EQUIPMENT

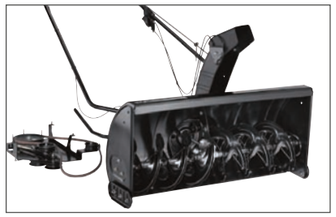
FOR CUB CADET LAWN TRACTORS

Use your Cub Cadet lawn or garden tractor all year around with the right attachments. With a front mounted dozer blade or snow thrower in combination with snow chains and spreader you are prepared for the challenges of a long lasting winter season.

INNOVATIVE FEATURES FOR AN INCREDIBLE EXPERIENCE **CUB CADET**

DOZER BLADE WITH OPTIONAL RUBBER LIP

For the different tractor models we offer a dozer blade with 117 cm width. To prevent the blade of damages from hidden obstacles the blade is equipped with an overload safety mechanism. The blade will tilt down automatically when hitting obstacles, afterwards returning to the working position by means of spring tension. Also available is a rubber lip.



FRONT MOUNTED SNOW THROWER FOR 1000 SERIES LAWN TRACTORS

Get this HD two-stage snow thrower (107 cm) when having extreme snow conditions. Equipped with Fast Attach ™ coupling system, it is mounted in no time. Lift system and chute are comfortably controlled from the driver's seat.

SNOW CHAINS

Snow chains are available for all Cub Cadet tractors to get a perfect grip under icy and slippery conditions.

TOW SPREADER

Serveral tow spreaders are available not only for fertilizing and seeding. Also in winter the spreaders can be used to spread salt or split. A perfect addition to all Cub Cadet tractors.

ACCESSORIES
FOR CUB CADET SNOW THROWERS

DOZER BLADE
Make more out of your snowthrower with an additional Dozer Blade. Use this Dozer Blade, when having little snow fall only.

- 100 cm working width
- Suitable for all Cub Cadet 2X and 3X Series snow throwers
- Zinc coated
- Pivoting to the right and left
- After the first installation, it is easy mountable
- Dozer blade: (Art.No.: 396-004-678)
- Optional attachment of an additional rubber lip (Art.No.: 396-005-678)

WINTER ENGINE OIL
We recommend the special winter engine oil (SAE 5W - 30) for the Cub Cadet winter engines built on all Cub Cadet snow throwers.
Capacity: 1000 ml.
Art.no.: 6012-X1-0040

COVER FOR SNOW THROWERS
Heavy gauge vinyl cover with straps. It is UV-resistant and water-repellent. Measurements: approx. 170 x 80 x 100 cm.
Art.no.: 2024-U1-0005

FUEL STABILIZER "EASY-RUN"
Snowthrowers have often long period of non-use. Therefore, we recommend to use a fuel stabilizer. This fuel conservation with oxidation protection binds water and protects the system against rust and corrosion. A reliable starting is thus assured. Capacity: 250 ml.
Art.no.: 6012-X1-0045

SHEAR BOLTS
The shear bolts connect the auger with the drive shaft. In case of unintended blocking of the auger, the shears act as rated break points.
Set of 4 bolts and cotter pins.
For all models except 933 SWE
Art.no.: 7011-M6-0010
For model 933 SWE
Art.no.: 7011-M6-0011

WARRANTY

*Manufacturing guaranty of MTD Products AG, limited supplementary performance, valid only through registration on https://b2c.cubcadet.eu
WARRANTY
3
YEARS*
Cub Cadet

Benefit from a **3-years warranty** when buying a **Cub Cadet** snow thrower!

In order to acquire the **3-years warranty**, you only have to register your snow thrower within a maximum of 60 days from the day of purchase.
For more information, please visit the registration page:

https://b2c.cubcadet.eu

The **3-years warranty** is then valid according to the MTD Products AG warranty conditions.
Please ask your authorized dealer for more information.

ARNOLD®
BE PART OF IT

Your parts specialist

Since November 2011 **ARNOLD** offers a various range of wearing parts and accessories for gardening, forestry and landscaping use all over Europe.

Additional to our variety of spare parts for all common brands **ARNOLD** is offering high quality workshop equipment and various accessories.

From Air filter till Wheels

The **ARNOLD** program includes all products to make working in and around the garden more comfortable and safe.

All **ARNOLD** articles are available for you in the market.

Cub Cadet

GENUINE Cub Cadet FACTORY PARTS

Perfect match, high durability.
Cub Cadet spare parts

- Designed for your machine
- Offer the best performance & reliability
- Only original parts get your machine warranty
- Rapid and sustained availability in Europe
- Tested according to our highest standards

Cub Cadet
AUTHORIZED DEALER

SERVICE AND MORE

Cub Cadet equipment is only available from an authorized Cub Cadet dealer, who can offer you a wide range of products and services. The dealer aims to provide fast, convenient service for you, whether you are interested in a new piece of equipment or simply need more information about a product or service.

Professional advice:

Each Cub Cadet dealer's sales staff is specially trained in selling lawn and garden equipment as well as snow throwers. They have been advising customers for many years and will help you choose the right piece of equipment.

Demonstration:

Your Cub Cadet dealer offers you the chance to start up the equipment and try it out yourself before you buy. At Cub Cadet, you know what you're getting!

Professional assembly:

Cub Cadet dealers fully assemble all equipment so you can start using it right away. Only well-assembled equipment and thorough instructions guarantee satisfaction.

Delivery service:

Large pieces of equipment that you are unable to transport yourself can be delivered right to your door by the Cub Cadet dealer.

Repair service:

If your equipment ever breaks down, your Cub Cadet dealer won't send it away but will repair it in his own workshop. Cub Cadet dealers specialize in providing repairs and replacement parts.

Financing:

Would you like to pay for your new equipment conveniently over the next few years? No problem! Your Cub Cadet dealer can offer you a suitable financing option.
